Subject Index

(BR): Book Review
(CR): Conference Report

A
acceptance 245 (CR), 348 (CR)
acetan 361
additives
  encapsulated 397
  toxicology of 352 (BR)
adjunct cultures for low-fat cheeses 367
adulteration 321
aflatoxins 2
  in milk 135 (CR)
AFM, *see* atomic force microscopy
ageing
  glycosylation of proteins 219
  low body weight 314 (CR)
  and oxidative damage 75
  and polyamine requirements 345
allergies 424 (BR)
Alzheimer's disease, and polyamine toxicity 342
amaranthin, quaternary structure 267
amines, biogenic 341
amorphous powders, caking 149
anaemia 312 (CR)
analytical techniques 32 (BR), 382 (BR), 411 (CR)
  antioxidative activity 273
  aromas 166 (CR)
  authenticity testing 321
  biopolymers 376 (CR)
  biosensors 250 (BR)
  dielectrophoresis 51
  enzyme-linked immunosorbent assay (ELISA) 80
  fluorescence spectroscopy 69
  leak detection in packaging 337
  magnetic resonance imaging (MRI) 111, 184
  microbial contamination 51, 287, 353, 370
  microstructure imaging 177
  package microleak detection 336
  protein structure 265
  sensometrics 206, 347 (CR)
  supercritical fluid extraction 216 (BR)
  time-series analysis 104
  ultrasound 293, 338
  virus detection 353
  water content determination 155
  water-soluble vitamins 64 (BR)
  yeast detection 287
  see also chromatography; microbiological test methods; microscopy; spectroscopy
antibody-linked probes 182, 372, 413 (CR)
antimicrobials
  encapsulation of 404
  enzymes as 390
  from lactic acid bacteria 213 (CR)
  in hurdle technology 45
  α-lactoglobulin–guar conjugates as 219
  for poultry 85
  targeting of 370
antioxidants
  controlled release of 405
  enzymes as 300
  in heat-processed foods 224
  natural 75, 271, 300, 319 (BR), 415 (CR)
apple juice, for babies 314 (CR)
aquaculture in developing countries 2
aromas, *see* flavours
artificial neural networks 103
  authenticity testing 323
Asian consumer markets 201
Asian medical foods 76, 216 (BR)
atomic force microscopy 184, 359
Australia
  food microbiology conference 163 (CR)
  Salmonella enteritidis strains in 407
  taste preferences 204
authenticity testing 321
automation, advanced process control 103

B
Bacillus subtilis, dielectrophoretic spectrum 54
Bacillus thuringiensis (Bt) δ-endotoxins 3
bacteria
  ice nucleation by 258, 259
  polysaccharides from 143, 362
  probiotic 241
  see also individual organisms; microorganisms
Bactocatch treatment, of milk 13
baking
  and controlled release 397
  egg white protein 226
  predictive control in 108
  yeasts for 289
ball drying 23
barrier technology, *see* hurdle technology
beans, and flatulence 277 (CR)
beer 217 (BR)
  yeasts for 289
beverages
  authenticity testing 324
  fermented, production of 217 (CR)
bioaffinity methods 413 (CR)
biocatalysts, for flavour production 166 (CR)
biofilms 370
biogenic amines 341
biosensors 250 (BR), 412 (CR)
  for aflatoxin detection 6
biotechnology, *see* biocatalysts; fermented foods; genetic engineering; individual microorganisms or applications
black tea
  antioxidants in 77
  aroma 135 (CR)
  pigments in 4
boar taint in pork 120
breast milk
  and allergies 424 (BR)
  polyamines in 344
browning
  effect on flavour 142 (BR)
  enzymatic 136 (CR), 195
  non-enzymatic, *see* Maillard reaction
Bt δ-endotoxins 3
butter, spreadable 126
butylated hydroxytoluene (BHT) 271

C
caking, amorphous powders 149
Campylobacter spp. 83
cancer
  dietary prevention of 75, 216 (BR), 282 (BR), 319 (BR), 415 (CR)
  reactive oxygen in 76
carbohydrates, *see* polysaccharides
carbohydrate polyesters, as fat substitutes 101 (BR)
carcinogens in foods 5
cardiovascular disease, dietary prevention of 81, 319 (BR), 333, 415 (CR)
β-carotene and cancer 282
carrot, water diffusion in 112
κ-casein glycomacropeptide (GMP) 18
caseins
  fractionation 15
  micelle structure 74, 181
cassava, processing 1
catalase 301
catechin, inhibition of tumour growth 76
cell culture, flavour production by 168 (CR)
cell wall
  bacterial, breakdown of 390
  plant, breakdown during senescence 385
  structure, and texture 177, 190, 363
centrifugal fluidized-bed drying 22
Centro Internacional de Agricultura Tropical (CIAT) 3
cereals
  antioxidants in 79
  biochemistry of 25 (CR)
  contamination of 2
  foodstuffs and intermediates from 94 (CR)
  stackburn of 2

supercritical fluid extrusion of 232
certified reference materials (CRMs), for food composition analysis 416 (CR)
chaptalization, of wine 324
cheese 381 (BR)
controlled release of ripening enzymes 404
detection of microorganisms in 371
low-fat 366
membrane processes 15
structure, by freeze–fracture TEM 182
see also dairy products
chemical migration, from packaging 172 (BR)
chemometrics 327
chemosensory perception 201
chestnuts, water, texture of 277 (CR)
chicken, *see* poultry
children
eating vegetables 246 (CR)
infant nutrition 314 (CR)
obesity in 313 (CR)
chilled food, stabilization 375 (CR)
China, cereals in 95 (CR)
chitinases, antifungal activity of 392
chloropropanols, process flavours 49
chocolate
cocoa butter substitutes 126, 333, 368
cholesterol, dietary regulation of
by green tea 76
by probiotics 243
chromatography 412 (CR)
of antioxidants 271
authenticity testing 321
gas chromatography olfactometry 48
cleanability assessment, *see* EHEDG Updates
co-extrusion 239
cocoa butter substitutes 126, 333, 368
coffee, spray drying of 21
collagen, detection by near infrared (NIR) fibre-optic spectrophotometry 119
collection of cells, by dielectrophoresis 55
colour
of meat 119
in senescence 386
in supercritical fluid extrusion 232
see also browning
combination methods
dehydration 22
electron microscopy 180
irradiation 7
low-fat cheese production 369
see also hurdle technology
composition of foods, databases for 414 (CR), 421 (BR)
conductimetry
for meat quality analysis 118
for water content determination 156
for yeast detection 287
Conference Reports
Agri-Food Quality '95 277
8th Australian Food Microbiology Conference 163
Bioflavour 95 – Biocatalysts for Flavour Production 166
Euro Food Chem VIII: Current Status and Future Trends in Analytical Food Chemistry 411
7th European Nutrition Conference 311
4th Food Choice Conference 245
8th Gums and Stabilisers for the Food Industry Conference 375
2nd International Conference on the Impact of Food Research on New Product Development 135
International Dairy Lactic Acid Bacteria Conference 212
2nd International Food Data Base Conference: Food Composition Research – The Broader Context 414
International Symposium and Exhibition on New Approaches in the Production of Food Stuffs and Intermediate Products from Cereal Grains and Oil Seeds 94
2nd Pangborn Sensory Science Symposium 347
Plant Polysaccharide Symposium 25
confocal laser-scanning microscopy (CLSM), high fat spreads 178
consensus conference, plant biotechnology 35
consumer preferences 206, 245 (CR), 347 (CR)
cultural influences 201
irradiated food 7
plant biotechnology 35
postharvest quality 388
process flavours 49
spreadable fats 329
texture 194
contamination 127
extraneous matter, detection of 296
microbial, of cheese 16
safe packaging 337
see also microbiology
controlled release 397
controllers, in processing 103
convection drying 20
'cooked' flavour 46
counter-current crystallization 123
crackers and cookies
dielectric drying 22
production of 29 (BR)
creaming, determination of 297
critical concentration, of gelling agents 361
critical moisture level 20
Crohn's disease, and polyamines 342
cryo-sectioning, sample preparation 179, 266, 371
cryo-SEM 179
cryo-TEM 266
cryopreservation 21, 253, 259
analysis by MRI 115
combined with irradiation 7
crystallization
of lipids at interfaces 364
of oils 121
of proteins 268
and ultrasound 293
cyanogen, and motor neurone disease 3
cyclodextrins, for controlled release 403
cytokines, nutrition and 312 (CR)
cytoskeleton, imaging 191, 363

D

dairy products 381 (BR)
authenticity testing 326
contamination 5
detection of microorganisms 370
fluidized-bed drying 21
functionality of constituents 12
lactic acid bacteria 212 (CR)
lipid chemistry 100 (BR)
preservation of 394
probiotics in 241
structure imaging 180
vitamin D content 416 (CR)
see also cheese; milk
databases, food composition 414 (CR), 421 (BR)
DDT (dichlorodiphenyltrichloroethane) 3
de-oiling, fats 180
dehydration 20
and MRI 113
see also freeze drying
demineralization, of whey 18
densitometry, water content determination by 156
depuration of shellfish 354
designer foods, *see* functional foods
detoxification
of mycotoxin contamination 6
of polyamines 342
developing countries 1
plant biotechnology 39
diabetes 311 (CR)
glycation products 219
diafiltration (DF) 12
diarrhoea, prevention with probiotics 242
dielectric drying 21
dielectrophoresis, microbial contamination detection 51
disease, *see* individual diseases; nutrition; pathogens
dispersions 137 (CR)
distillation, water content determination 156
downstream processing 104
drum drying 20

drying, *see* dehydration

E

edible films and coatings 29 (BR), 424 (BR)
egg white
deterioration in storage 219
protein functionality 225
eggs
irradiated 8
Salmonella in 164 (CR), 407
EHEDG Updates (European Hygienic Equipment Design Group)

equipment for open processing 305
test rigs 132
electrometry, *see* conductimetry
electron energy loss spectrometry (EELS) 181
electron microscopy 177, 265
compared with AFM 359
of extruded foods 239
of foodborne viruses 354
of food powders 154
high-pressure cryofixation 254
protein imaging 265
electronic noses 412 (CR)
electrophoretic karyotyping, yeast 288
elemental analysis 183
emulsions
detection of microorganisms in 370
droplet size determination 297
generation by ultrasound 293
glucose oxidase–catalase system in 301
and lysozyme 219
microstructure of 139 (CR)
stabilization of 363
encapsulation 397
δ-endotoxins, *Bacillus thuringiensis* (Bt) 3
energy intake, regulation of 246 (CR), 313 (CR)
energy-dispersive (EDX) detection 183
Enterobacter cloacae, dielectrophoretic spectrum 54
environmentally friendly technology 37, 138 (CR)
life cycle assessment 30 (BR)
enzymatic browning 136 (CR), 195
enzyme immunoassays (EIA), virus detection 354
enzyme-linked immunosorbent assay (ELISA)
authenticity testing 327
to measure oxidative stress 80
enzymes 352 (BR)
antimicrobial 390
as antioxidants 300
controlled release of 404
inhibition by ultrasound 293
modification of triacylglycerols 329
oxidation of polyamines 342
role in senescence processes 387
epidemiology, of food poisoning 84
equilibrium relative humidity (erh) 2
Escherichia coli 127, 355
dielectrophoretic spectrum 54
E. coli 0111 163 (CR)
E. coli 0157:H7 163 (CR)
essential oils 276
ethanol, inhibition of microbial spoilage 43
ethical issues 37
ethylene 164 (CR)
role in senescence 385
European Hygienic Equipment Design Group, *see* EHEDG Updates
expansion model, for plant cell walls 192
explosive puffing 24
extraction
of edible oils 4, 121
in fat analysis 415 (CR)
of flavours from bioprocesses 168 (CR)
supercritical fluid 123, 216 (BR), 411 (CR)
extrinsic probes 71
extrusion
encapsulation by 403
and flavour generation 384 (BR)
supercritical fluid 232

F

factorial analysis, of ethanols 323
fat
in cheese 366
consumer preferences 329, 348 (CR)
effect on health 138 (CR)
and energy intake 246 (CR)
in meat and meat products 119
visualization by electron microscopy 180
see also lipids; oils
fat mimetics 367
fat replacers 246 (CR), 366
fat substitutes 367
carbohydrate polyesters as 101 (BR)
fatty acids, *trans* 329
feedforward controllers 107
fermented foods 352 (BR)
beer, wine, and spirits 217 (BR)
dairy products 14, 241, 381 (BR)
and hurdle technology 43
meat and meat products 171 (BR)
probiotics in 213 (CR), 241
fibre 65 (BR)
fibre-optic probes for meat quality analysis 119
filtration 12
pressure, oil fractionation 122
fimbriae, and *Salmonella enteritidis* 407
fish
caking in hydrolysate powders 153
contamination of 5
high-pressure thawing 256
low-temperature, high-pressure storage 257
modification of oils 333
polyamines in 344
processing 136 (CR)
quality 2
safe packaging and HACCP 336
flatulence, and beans 277 (CR)
flavonoids, and cardiovascular disease 415 (CR)
flavours 173 (BR)
analysis of 412 (CR)
biocatalytic production 166 (CR)
controlled release of 403
cultural preference 201
from heat treatment 384 (BR)
incorporation during supercritical fluid extrusion 232
interaction with packaging 424 (BR)
lipids in 142 (BR)
low-fat cheeses 366
meat and meat products 48, 64 (BR)
natural 168 (CR), 318 (BR)
process 46
see also off-flavours
FLAVR SAVR™ tomatoes 387
flow rate measurement 296
fluid extraction, supercritical, *see* supercritical fluid extraction
fluidized-bed drying 21
fluorescence spectroscopy 69
foaming 376 (CR)
egg white protein 225
folates, prevention of neural tube defects 313 (CR), 416 (CR)
food poisoning, *see* individual organisms; microbiology
by viruses 165 (CR), 353
forest products 1
formula milk
polyamines in 344
probiotics in 241
fractal analysis 184
fractionation
caseins 15
oils 121
whey proteins 18
free radicals
formation of 75, 299
scavenging of 224, 301
free-choice profiling (FCP) 206
freeze drying 21
bacterial ice nucleation 263
lemon juice, caking of 150
potatoes 115
freeze fracturing, process cheese 182
'freeze slamming' 363
freeze-texturing 261
freezing
bacterial ice nucleator assisted 258, 259
high-pressure assisted 253
fried foods, reactive oxygen in 76
FRNA coliphages 357
frozen food, stabilization of 375 (CR)
fruit
browning of 195
contamination of 5
flavour 136 (CR)
low-temperature, high-pressure storage 257
mealiness 193
minimally processed and refrigerated 67 (BR)
and pesticides 137 (CR)
polyphenols 197
postharvest quality 385
ripening 188
wooliness 193
fruit juices, adulteration 321
functional foods 59, 66 (BR)
see also medical foods; probiotics
functionality
of polysaccharides 143, 219, 375 (CR)
of proteins 219, 265
dairy 12
egg white 225
fungal cell-wall-degrading enzymes 391
fungi, *see* yeasts
fuzzy logic control 103

G

gap analysis 283 (BR)
gas chromatography olfactometry technique 48

gas sensors, analysis of meat and meat products 168 (CR)
gelatin 375 (CR)
drum drying 20
gelation
of egg white protein 225
in heat-processed foods 219
of polysaccharides 361, 377 CR)
gellan 143
in confectionery 377 (CR)
generalized Procrustes analysis (GPA) 206
genetic changes, in bacteria in response to stress 129
genetic effects of taste preferences 203
genetic engineering 199
consumer attitudes to 35, 245 (CR)
control of enzymatic browning 197
control of senescence 385
of crops 277 (CR)
detection of genetically modified organisms 413 (CR)
of lactic acid bacteria 212 (CR)
of microorganisms, to produce antimicrobial enzymes 395
glassy state, caking of amorphous powders 150
globulin, electron microscopy of 267
β-glucanase, as antimicrobial 392
glucose oxidase (GOX) systems 301, 393
grain
feedforward control in dryers 108
storage 1
green tea, antioxidants in 76
gums 143, 219, 368

H
HACCP (hazard analysis and critical control points) 31 (BR), 90, 336
meat and meat products 120, 163 (CR)
haemolytic uraemic syndrome (HUS) 163 (CR)
heart disease, *see* cardiovascular disease
heat damage, cereals 2
heat stress, microbial 130
heat treatment
effect on antioxidants 275
effect on macromolecule functionality 219
flavour generation by 46, 142 (BR), 384 (BR)
of egg white 228
see also hurdle technology; pasteurization; sterilization
hedonic values 204, 206, 347 (CR)
Helicobacter pylori 244
hepatitis A virus (HAV) 353
herbal medicines, antioxidants in 79
herbs and spices
as antioxidants 79, 271
dietary prevention of cancer 216 (BR)
high-intensity ultrasound 298
high-pressure
cryofixation for microscopy 254
egg protein gelation 231
ice–water transitions 253
see also hurdle technology
high-pressure, high-temperature processing 377 (CR)
high-temperature, short-time nut roasting 108
high-temperature treatment, of milk 13
homeostasis, and hurdle technology 43, 127
honey, authenticity testing 325
horticulture 1
hurdle technology 41, 127, 135 (CR)
hydration 375 (CR)
hydrocolloids 375 (CR)
hydrolases
antimicrobial activity of 390
in fruit ripening 387
hydrolysed vegetable proteins 49
Hydropress 123
hygiene, *see* EHEDG Updates; HACCP; microbial decontamination
hygroscopicity of food powders 149

I
IAEDANS label, for protein conformation 73
ice
crystallization 253
nucleation by bacteria 258, 259
ice-cream 375 (CR)
imaging 177
atomic force microscopy 184, 359
interfaces 363
leak detection 338
microstructure 177
polysaccharides 361
proteins with electron microscopy 265
real-time changes, magnetic resonance imaging (MRI) 111
spray-dried milk 154
ultrasonic 298
see also individual microscopic methods; microscopy
immune electron microscopy 354
immune system, intestinal 424 (BR)
immunolocalization, of proteins and polysaccharides 182
Ina gene 260
indirect conductimetry, yeast detection 288
infant nutrition 314 (CR)
intellectual property rights 39
interesterification, triacylglycerols 329
interfaces, imaging of 363
intestinal immunity 424 (BR)
intrinsic probes 71
inventory analysis 30 (BR)
iodine deficiency 312 (CR)
iodized salt 312 (CR)
iron nutrition 312 (CR)
irradiation 7, 135 (CR), 164 (CR), 245 (CR), 413 (CR)
control of *Campylobacter* spp. 86
isotope ratio mass spectrometer (IRMS) 321

J
jams and jellies 21
authenticity testing 324
Japan
functional foods in 216 (BR)
life expectancy 76
taste preferences 204

K

trisodium phosphate (TSP), as antimicrobial agent 85
tryptophan probes 71
tyrosine probes 72

U

ultrafiltration (UF) 12
ultrasound 293
detection of package microleaks 338
use in drying liquids 23
meat quality analysis 118
uniform transmembrane pressure (UTMP) concept 13

V

validation of microbiological test methods 165 (CR)
vasopressin, electron microscopy of 268
vegetables
browning of 136 (CR), 195
and children 246 (CR)
contamination of 5
minimally processed and refrigerated 67 (BR)
and pesticides 136 (CR)
phenolic compounds in 197
postharvest quality of 385
vegetarianism 313 (CR)
Vibrio cholerae 163 (CR)
virulence factors, of *Salmonella enteritidis* 407
viruses
detection 353
and food poisoning 165 (CR), 353
vitamins
analysis 64 (BR), 416 (CR)
controlled release of 397
vitamin A 282 (BR), 319 (BR)
vitamin B_{12} 313 (CR)
vitamin C 137 (CR), 282 (BR), 319 (BR)

vitamin E 74, 77, 282 (BR), 319 (BR), 405

W
water
safety of 355
solid–liquid phase diagram of 253
water activity
and microbial stress 127
in food preservation 42
water chestnuts, texture of 277 (CR)
water content, determination of 155
wavelength-dispersive (WDX) detection 183
welan, structure–function relationships 147
whey
lipid removal in 17
lipoproteins in processing 17
protein 368
whipping, *see* foaming
wild rice, antioxidants from 75
wine 217 (BR), 412 (CR)
antioxidants in 81
chaptalization 324
yeasts for 289
'winterization' 121
wooliness, of stone fruit 193
Wrexham conference 375 (CR)

X
X-ray detection of package microleaks 338
X-ray diffraction, of biopolymers 143
xanthan 361, 375 (CR)
structure–function relationships 147

Y
yeasts
detection and identification 287
low-temperature, high-pressure storage 257
Neurospora crassa, enzymatic browning 196
yoghurt, *see* fermented foods; dairy products

Back Issues of Elsevier Trends Journals

Back issues from 1994 and 1995 are available to our customers at the following rates. Please state which issue(s) and quantity you require, including the volume and number (or year and month).

Issues(s): _____

_____

_____

Please tick how many copies you would like below. Back issues are available in bulk at discounted rates – institutions/libraries must pay institutional rates.

Individual Rates

- ❑ Single copy £18.00/$29.00 each
- ❑ Five copies £76.50/$123.25 (includes 15% discount)
- ❑ Ten copies £135.00/$217.50 (includes 25% discount)

Institutional Rates

- ❑ Single copy £40.00/$64.00 each
- ❑ Five copies £170.00/$272.00 (includes 15% discount)
- ❑ Ten copies £300.00/$480.00 (includes 25% discount)

*Hardbound compendia of previous volumes are available to institutional subscribers. Please ask for further details.

PAYMENT METHOD:

- ❑ Personal cheque, Eurocheque, or money order made payable to **Elsevier**
- ❑ Credit card
  - ❑ Visa ❑ Mastercard ❑ American Express

Card no: _____

Expiry date: _____

Name on card: _____ Signature: _____
